SETUP

Bus Quiet

In "Bus Quiet", the NVM can be read, modified and reprogrammed by means of a NVM

In "Bus Quiet", the NVM can be read, mounts and reprogrammed by means of a NVM Programmer. The season of a NVM Programmer. The "IV should remain in "Bus Quilet" mode until either Edt, Left, Right, Up, Down or Standby keys on the ROU of local keyson carry out a warmstarf in order to prevent, differences between the NVM and RAM contents.

contents.

After returning from Bus Quiet, the software checks the NVM content.

If it is not valid, the software perform a new default writing of the NVM content.

En mode bus quiet la NVM peut être lue, modifiée et reprogrammée. Accès au mode Bus quiet : Longue pression ">"

Accès au mode Bus quiet:
Longue pression *>".
Utiliser fune des touches Exit, Gauche, Droite
Haut, Bas, standby ou une des touches du
clavier pour sortir le téléviseur du mode bus
quiet.
A partir de ce point de sortie le démarrage
du téléviseur s'effectue à chaud pour éviter
toute différence des contenus RAM et NVM.
En sortie de mode bus quiet, le logiciel
contrôle le contenu de la NVM.
S'il r'est pas correct le logiciel exécute une
nouvelle écriture par défaut de celle-d.

m "Bus Quiet"-Modus kann er inhalt des NVM mittels eines oxfernen NVMProgrammiergreites ausgelesen, geändert oder neu programmiert werden. "Bus Quiet" wird durch einem längeren Druck auf ">" sikhlyert. Des Gerät bielts sollenge im Plaus Eulet", Nobe, bei der Grand eine Plaus Eulet in Nobe bei der Grand eine Plaus Eulet in Schware-Check des NVM-Inhaltes. Solle meine Eint gülftig sein, wird der Inhalt mit Default-Werten überschrieben.

in Modo Bus Quiet, la memoria NVM può essere letta, modificata o riprogrammata. Per accedere al modo Bus Quiet premere a lungo il tasto ">". Il TV rimane in modo Bus Quiet

II TV rimane in modo Bus Quiet fino a che vengono premuti i tasti Exit, o Destro Sinistro, Su o Giù o Standby dal telecomando o dalla tastiera locale; a questo punto il TV riparte per evitare interferenze tra i contenuti della memoria NVM e della RAM. All'uscita dal modo Bus Quiet, il software controla il contenuto della memoria NVM. Se tale contenuto non è valido, il software provvado è una nuore programmazione della NVM con l'insertimento del defauti defauti.

En bus quieto, la NVM puede ser leída, modificada y reprogramada.

Acceso a bus quieto: Larga presión en ">"
El TV permanecerá en bus quieto hasta que
se pulse cualquiera de las teclas siguientes:
Exit, "<", ", ", ", ", ", " o Standby del telemando o del teclado. En este momento el TV arrancará para evitar

cualquier differencia entre los contentidos de la RAM y NVM.

A salir del modo bus quieto, el software comprueba el contenido de la NVM.

Si no coincide, el software ejecuta la escritura de los datos en la NVM.

Clear Error To clear all error codes stored in the NVM. Action: Long press (> 2.5eec.).
Press </>/OK: remote control. CODE LED Error Codes CODE LED Error Codes

1. The last five error codes are stored and
displayed with a time stamp from the run time counter
2 firs error code as the stready in the list the time
stamp is updated.
3. The errors are displayed with the most recent
error on tip of the list. The others follow with
escending time stamps.
Displaying Error Codes with LED:
1. In addition to storing an error code it must also be
displayed with the TVS Standby LED.
Only the last error that course of a displayed.
2. Decimal error codes from 11 to 99 (with second
diction to being on error that course of displayed. digit not being 0) are signalled.

3- The error code is displayed as two separate digits separated by a suitable pause, this is repeuntil the either the TV fixes the fault or the TV is repaired. For example Error-code : 23 will be displayed thus : List of Errors Codes : see table 1- Mémorise les cinq demiers codes erreurs. Le cumul du temps de fondionnement entre le démarrage initial du chassis en usine et le moment où s'est produit l'erreur est indiquée en colonne "Time stamp".

2. Si une erreur oui est délà dans la liste survient de 2. St une error qui et digit dans la liste aurviert de nouveau le temps curulei (Time sistem) est mis à jour. 3- Les erreurs les plus récertes sont effichées en tête de liste. Les autres autvent en descendant. Affichage des Codes Erreurs par LED: 1- Les Codes erreurs ont dignales par le clignotement de la LED Standby du 17 / Sautement la demitre de la LED Standby du 17 / Sautement la demitre de la LED Standby du 17 / Sautement la demitre de la LED Standby du 17 / Sautement la demitre de la Company de la confession de la conf on van our ronne est aniches.

2- Les codes Erreurs décimeux vont de 11 à 99.
(le second digit n'est jamais égal à 0).

3- Le code Erreurs est signalé par deux digits selon une séquence spécifique Exemple : Code Erreurs : 23 affiché 2 flashes, courte pause 3 flashes : longue pause Voir ci-après la liste des codes erreurs Les werden die letzten 5 Fehlercodes mit der Laufzeit des Auftreitens angezeigt.

2. Titt den Fehler auf, der echon in er Liete 2. Titte der Fehler auf, der echon in er Liete 2. Titte der Fehler auf, der echon in er Liete 2. Der zusätzt aufgetreiten Fehler sehrt an enster Stelle. Die vorhergogangenen Fehler werden nach banehmender Lutzeit geleitet. Anzuge des Fehlercodes über die Standby-LED des TV-Gerätes durch Binken angezeigt.

2. Es können die Fehlercodes 11 bis 98 (ohne diejenigen, die eine Null als zuselte Stelle haben) diejenigen, die eine Null als zuselte Stelle haben) diejenigen, die eine Null als zuelte Stelle haben durch Binken, getrent von einer Pause angezeigt. Dies wird wiedendit, bis der Fehler zuseit der Anzeige für den Fehler von der Verlage der V

Aufstellung der Fehlercodes: siehe Tabelle

ERROR CODE CODE LED Error Codes Gil ultimi cinque codici errore vengono memorizzati
e visualizzati con un time stamp dai run time counter.
 Se si manifesta un errore già presente nella lista il
time stamp viene aggiornato
 Gil errori vengono visualizzati con l'errore più recente in cima alia lista.
Gli altri errori seguono con sequenza disci time stamp Lampeggi LED: Tresmissione messaggi I Oltre alla memorizzazione il codice errore, deve anche essere visualizzato dal LED di standby. anche essere visualizzato dal LEID di standby.

2 Gil errori vengono segnalati con codici decimali da

11 a 99 (non con 0 al secondo digit)

3 il codice errore viene visualizzato da due digit separati da una pausa, queto viene ripetuto finchè il difetto è presente o il TV viene riparato
Per esemplo il codice errore 23 sarà visualizzato: 2 iampeggi e una breve pausa 3 iampeggi iampeggi e una lunga pausa Lista Codici Errore: segue tabella Los últimos 5 códigos de error son almacenados desde el contador de tiempo de vida y mostrados en la columna "time stamp" la columna "time stamp"
2- Sì courre un error que ya existe en la lista, éste se actualizará al último "time stamp"
3- Los errores más recientes eon los mostrados en la parte superior de la lista. Los demás alguen en orden pare superior de la issa. Los demas aguen en orden descendente de 'three stamp'. Códigos de error mostrados con el LED: - Además del almacenamiento, los codigos de error también se muestran con el LED de standby del TV. Só se muestra el diffure error countdo. Só se muestra el diffure error countdo. cero, no) 3- El código de error es mostrado como 2 dígitos S-El coulgo de error es mioraran como 2 quitos separados por una pausa corta. Se replis hasta que se recupere el fallo o el TV sea reparado. Por ejemplo, el código de error 23 se mostrará como 2 destellos seguidos de una pausa corta 3 destellos seguidos de una pausa larga

REV 03 - 2000/02 9-948-441-10

WARNING: Before servicing this chassis read the safety recommendations.

ATTENTION : Avant toute intervention sur ce châssis, lire les recommandations de sécurité.

ACHTUNG: Vor jedem Eingriff auf diesem Chassis, die Sicherheitsvorschriften lesen.

ATTENZIONE: Prima di intervenire sullo chassis, leggere le norme di sicurezza.

IMPORTANTE : Antes de cualquier intervención, leer las recomendaciones de seguridad.

Do not disconnect modules when they are enregized! Repairs on power supply section are to be carried out only with isolating transformer.

Ne pas retirer les modules lorsqu'ils sont sous tension. N'effectuer les travaux de maintenance sur la partie reliée au secteur (Switch Mode) qu'au travers d'un transformateur d'isolement. Module nicht bei eingeschaltetem Gerät entfernen! Servicearbeiten am Netzteil nur unter Verwendung eines Regeltrenntrafos durchführen.

Non scollegare i moduli quando sono alimentati! Intraprendere riparazioni sulla sezione alimentatore solo con trasformatore isolante.

No desconectar los módulos cuando están activados. Las reparaciones en la sección de alimentación de energía deben ser ejecutadas solamente con un transformador de separación.

 \triangle Indicates critical safety components, and identical components should be used for replacement. Only then can the operational safety be garanteed.

Le remplacement des éléments de sécurité (repérés avec le symbole \triangle) par des composants non homologués selon la Norme CEI 65 entraine la non-conformité de l'appareil. Dans ce cas, la responsabilité du fabricant n'est plus engagée.

Wenn Sicherheitsteile (mit dem Symbol gekennzeichnet) nicht durch Original - Ersatzteile ersetzt werden, erlischt die Haftung des Herstellers.

La sostituzione degli elementi di sicurezza (marcati con il segno 1) con componenti non omologati secondo la norma CEI 65 comporta la non conformitá dell'apparecchio. In tal caso è "esclusa la responsabilità" del costruttore.

La sustitución de elementos de seguridad (marcados con el simbolo $\hat{\bot}$) por componentes no homologados segun la norma CEI 65, provoca la no conformidad del aparato. En ese caso, el fabricante cesa de ser responsable.

Note: During measurements in the power supply unit, use the primary power unit ground (Emit. TP060).

Attention: Mesures dans le bloc alimentation. Utiliser la masse du bloc alimentation (Emet. TP060).

Achtung: Bei Messungen im Primärnetzteil. Primärnetzteilmasse verwenden (Emit. TP060).

Attentionze: Misure nell'alimentatore primario. Usare massa alimentazione primario (Emet. TP060).

Cuidado: Medida en el bloque de alimentación. Utilizar la masa del bloque de alimentación (Emet. TP060).

- En UHF, niveau d'entrée 1 mV
 Par la prise Péritélévision, nive
- Par la prise Péritélévision, niveau d'entrée 1Vcc.

Couleur, contraste, lumière à mi-course, son minimum. Programme affecté PR 01.

Tensions continues relevées par rapport à la masse avec un voltmètre numérique.

EMPFÄNGER:

Farbbalken: PAL, Norm G, Weiss 100%

- Bei UHF Eingangspegel 1 mV.
- Über die Scartbuchse : Eingangspegel 1 Vss.

Farbe, Kontrast, Helligkeit in der Mitte des Bereichs, Ton auf Minimum. Zugeordnetes Programm PR 01.

Voltmeter zur Masse gemessen.

Gleichspannungen mit einem digitalen

RICEVITORE:

Monoscopio per barre : PAL, norma G.

- bianco 100%.
- In UHF, livello d'entrata 1 mV,
- Per la presa SCART, livello d'entrata 1 Vcc.

Colore, Contrasto, Luce a metä corsa, Suono minimo.

Programma designato PR 01.

Tensioni continue rilevate rispetto alla massa con un voltametro numerico.

RECEPTOR:

Mira de barras : PAL, norma G, blanco

100%.

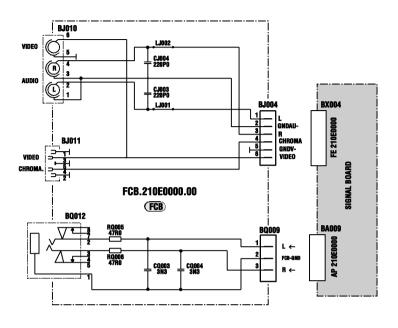

- En UHF, nivel de entrada 1 mV,
- Por la toma Peritelevision, nivel de entrada 1 Vpp.

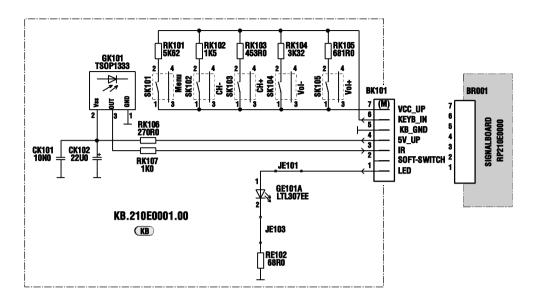

Color, Contraste, luz a mitad de carrera, Sonido minimo.

Programa afectado PR 01.

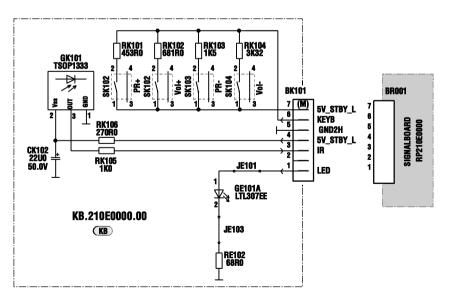

Tensiones continuas marcadas en relacion a la masa con un voltimetro digital.
